OUR STORY

Rooted in Purpose. Built for the Future.

In the fertile lands of Nkata, Igbanke, Edo State — strategically positioned near Agbor and connected to thriving commercial communities — a vision was born.

That vision is **NBN Integrated Farms**.

What began as an idea inspired by the realities of food insecurity, unemployment, and the growing need for sustainable agriculture is steadily becoming a modern agricultural enterprise built on discipline, innovation, and long-term impact.

NBN Integrated Farms is not simply another poultry business.

It is a growing ecosystem designed to contribute meaningfully to food production, job creation, agricultural sustainability, and economic development within Nigeria and beyond.

We believe agriculture should do more than produce food.

- ✓ It should create opportunities.
- ✓ It should empower communities.
- ✓ It should restore dignity to hard work.
- ✓ And most importantly, it should build the future responsibly.

for Future Generations"*

WHY NBN EXISTS

Across many communities, access to stable food supply remains uncertain. Young people continue to search for meaningful employment opportunities, while local markets struggle with inconsistent agricultural distribution and rising costs.

NBN was created as a response to these challenges.

Our mission is to build a reliable and scalable agricultural system capable of serving both present and future needs through quality poultry production, responsible operational systems, and progressive agricultural practices.

From our location in Igbanke, we are strategically positioned to serve surrounding communities across Edo State, Delta State, and beyond.
